EXPERIENCE

ML Engineering Intern @ ISRO Research Laboratory (PRL):- Developed and deployed various ML models to clean and pre-process the huge datasets consisting in netCDF format, achieving 0.92 accuracy. Used the dataset to plot the emission and concentration of pollutants using OpenCV.

AI/ML Research Intern @ NIT Delhi:- Engineered and executed sophisticated machine learning algorithms to analyze expansive datasets, achieving a classification accuracy of 0.92 while providing actionable insights for environmental data management.

Content Correspondent Intern @ Aashman Foundation:- Conducted statistical research on slums in developed nations, providing valuable insights for the foundation's initiatives that improved outreach efforts by 5 percent

PROJECTS

Data Science: Interview Recommendation System (011/2024 - 12/2024):- Developed a model that uses NLP and machine learning to match candidates with suitable job roles by analyzing their performance in an interview, enhancing recruitment efficiency and personalized up-skill recommendations.

Generative AI: Text-to-Image-Generator (07/2024 - 09/2024):- Developed a web application over Streamlit that generates images from text inputs using Amazon's Titan LLM model. Users can create diverse images simply by typing in names or descriptions.

NLP Project: Sentiment Analysis and Labelling of Tweets (05/2024 - 07/2024):- Developed an NLP pipeline for tweet sentiment analysis using GloVe, LSTM, Decision Tree, Random Forest, Logistic Regression, KNN, and SVM achieving 0.92 accuracy in analyzing sentiments.

BERT: Topic Segmentation Model (03/2024 - 04/2024):- Developed an advanced ML model using BERTopic for precise query segmentation by topic from a large dataset with 0.93 precision.

SKILLS

Programming Languages:	Python, Java, C, C++
Large Language Models:	Claude, Llama, Titan, BERT
ML Algorithms:	SVM, Naive Bayes, KNN, RBM, Decision Tree, Random Forest
AI Algorithms:	Ant Colony Optimization, Particle Swarm Optimization, Butterfly Optimization Algorithm
Deep Neural Networks:	LSTM, RNN, CNN
NLP Models:	BERT, Glove, FastText
ML Frameworks:	TensorFlow, PyTorch, Keras, NLTK, Gensim
Tools:	SQL, Google Colab, Kaggle, Jupyter Notebooks, VS Code, AWS Cloud, NetBeans

EDUCATION

B.Tech in Computer Science , Shri Mata Vaishno Devi University	Expected 2025
CGPA: 8.58	

12th Boards(Non-Medical) , SP Smart Hr. Sec. School	2020 - 2021
Percentage: 98
